## WHAT IS THE PRODUCT?

**Type:** Mutual fund

**Duration:** The fund has no maturity date. The Fund Management Company has the right to close the fund and redeem the shares.

**Objectives:** The fund is an actively managed mixed fund that invests in equities and interest-bearing securities. The fund will strive to maintain a distribution of 70 to 90 percent in equities and 10 to 30 percent in interest-related financial instruments or in accounts with credit institutions. The fund may invest in transferable securities traded in currencies other than Swedish kronor. Consequently, the fund invests globally and takes into account the fund's ethical and sustainable investment profile. The companies that the fund invests in promote sustainable energy production, sustainable energy consumption, sustainable transport, and sustainable living habits. The fund disqualifies companies involved in any of the following activities: the production of alcohol, tobacco or pornography; the production of weapons; commercial gambling operations; the production, transport or sale of fossil fuels; nuclear power; and/or animal testing. Considerable importance is attached to whether the companies are registered and/or operate in countries with a high level of corruption (in accordance with the Transparency International Corruption Index). The fund is actively managed and does not follow any index. This means that the manager makes their own active investment decisions. The aim is for the fund to exceed its benchmark index in the long term. The fund's benchmark index consists of the MSCI World Index converted to SEK (80%) and the OMRX Bond All Index (20%). The fund does not pay dividends. Fund units can normally be purchased or sold on all banking days. The fund's return is determined by how the value of the holdings in which the fund invests increase or decrease during the holding period.

**Target group:** This fund may be suitable for savers who plan to keep their investment for at least five years and who are aware that the money invested in the fund can both increase and decrease in value and that there is no certainty that the entirety of the capital invested can be recovered. No special prior knowledge or experience with mutual funds or financial markets is required in order to invest in the fund.

**Other:** The Depository: Skandinaviska Enskilda Banken AB (publ.). The annual report, half-year report, information brochure, latest share values, and other practical information are available free of charge in Swedish at <https://aifmgroup.com/proethos/>

## WHAT ARE THE RISKS AND WHAT RETURNS CAN I ACHIEVE?

### Risk indicator

The summative risk indicator provides guidance on the level of risk of this product compared to other products. It shows how likely it is that the product will decrease in value due to market developments. We have classified the product as level 4 out of 7, i.e. a medium risk class. This means that the fund has a medium risk of increases and falls in the share value. The indicator primarily reflects increases and falls in the shares the fund is invested in. Risks that are not captured by the risk indicator include: Liquidity risk: In the event of extreme circumstances on the fixed-income market, there is a risk of not being able to withdraw money from the fund within the set time, as the corporate bond market is characterised by lower levels of liquidity than the stock market. Credit risk: The risk of loss if the issuer of a fixed-income security is unable to pay the ongoing yields or repay the loan on the due date. Operational risks: Delays and errors in processes, political decisions and government decisions etc. may adversely affect the fund. This product does not include any protection against future market performance. You may therefore lose all or part of your investment.

## WHAT HAPPENS IF THE FUND CANNOT MAKE ANY PAYOUTS?

By law, the fund's assets may not be held by the Fund Management Company. Instead, each fund must have a special depository that takes care of holding the fund's assets. In the event that the Fund Management Company goes bankrupt, the management of the fund is taken over by the depository. There is no compensation or guarantee scheme for investors in the fund.
